

## The Philosophy of Crestwood Dental Clinic

Crestwood Dental Clinic has a long history in this community. The clinic was initially established in the 1970's under the guidance of Dr. Cliff Hrankowski. The practice was set up with the goal of becoming an integral part of the community of Medicine Hat.

Over the years the practice has grown considerably and has attracted new dentists who desire to carry on the traditions and philosophy of the founder of the office. The guiding philosophy of Crestwood Dental Clinic can perhaps best be summed up by our desire to provide the highest quality surgical, cosmetic and restorative and prosthetic dental care available.

This philosophy of treatment would not have been possible without the aid of many co-workers in the dental profession and an office team with similar goals and desires. Our staff and facility combine to offer treatment on an individual, caring, and personalized basis in a relaxed and professional atmosphere. A unified effort by our healthcare team will enable us to achieve our goal of providing superior care to our patients.

Underlying this goal of serving the community has been the desire to provide Medicine Hat's citizens with caring treatment that meets the needs of individuals from all walks of life. The heart and pulse of the clinic has been led by a desire to place our team at the disposal of our patients – no matter their status. Our philosophy has been exemplified by our wish to provide treatment to all, with integrity, guided by high moral and ethical standards.

This treatment philosophy lets us look at your long term dental picture, creating a plan that will allow for your mouth to be its healthiest now, and in the future. A comprehensive plan for ideal dental health blends the art and science of dentistry with everyday realities of lifestyle and personal attitudes about health.
